PROJECTS

RecipeShare – Interactive AI Recipe Sharing Platform

[Live Demo](#) — [GitHub Repo](#)

Technologies: MongoDB Atlas, Express.js, React 19, Node.js, Mongoose, JWT, Bcrypt, Gemini API, Bootstrap 5

Key Features:

- **Auth & Security:** Secure login/signup with JWT, HttpOnly cookies, and OTP-based password reset.
- **Recipe Management:** Full CRUD controls (add, edit, delete, view) with strict owner-only access.
- **AI Magic Fill:** Auto-generates recipe details via Gemini API and fetches images via Unsplash API.
- **UX & Analytics:** Voice search (Speech API), live search, category filters, favorites list, and aggregation stats.
- **API Guard:** Added server rate limiting and CORS protection for secure production deployment.

Bug Fixes & Solutions:

- **CORS & Cookies:** Fixed cookie issues and CORS errors between Vercel (frontend) and Render (backend).
- **Session & Logout:** Fixed a bug where the logout action failed to clear cookies properly.
- **SMTP Fallback:** Fixed Render hosting email failures by adding a fallback mock-logic to keep OTP working.
- **Security Policy:** Blocked users from reusing any of their last 3 passwords during resets.
- **Data & UI Fixes:** Fixed missing images when skipping AI fill, and applied title-case to prevent duplicate names.
- **State Management:** Fixed a UI lag bug to make the favorites button update instantly on click.
